Senior Program Director  
MHP Salud  
spatrick@mhpsalud.org

# Farmworker Health Network

The Farmworker Health Network works cooperatively with HRSA to provide training and technical assistance to over a **thousand Community & Migrant Health Centers** throughout the U.S.

# Workshop Components

---

- **Overview of agricultural worker health and safety concerns**
- Service delivery innovations
- Resources for health centers to address issues for agricultural workers.

# Zoom Poll

How many years working in Migrant Health?

- 0-3
- 4-7
- 8-10
- 10+

To understand the challenges faced by agricultural workers living and working in our nation today, it is important to understand where this system of labor came from and what efforts have been made over the years to ensure their access to healthcare services.

# Events leading up to MH Program

1850's

Advances in crop production, machinery, transportation and refrigeration, increase the demand for a migratory seasonal labor force

1917 – 1921

World War I and the Immigration and Nationality Act of 1917

1930 – 1936

Dust Bowl and start of domestic migration

1937

Farm Security Administration is established

1942: "Bracero Treaty"

Recruitment & employment of Mexican citizens during WWII

1950's

Public Health Service establishes the Migrant Health Unit

**1960**

- Edward R. Murrow's documentary, "Harvest of Shame" aired on Thanksgiving Day

**1962**

- The Migrant Health Act signed into law by President John F. Kennedy

**1970**

- Reauthorization of Migrant Health Act created the National Advisory Council on Migrant Health and added seasonal workers

# Timeline of Legislative Action

## Migrant Health Act

Aid to agencies that provide community health services to agricultural workers and their families

1962

## Migrant and Seasonal Agricultural Worker Protection Act

Basic labor protections under labor contractors

1983

## Health Centers Consolidation Act

Consolidates MHC, HCH, public housing and CHCs under Section 330 Authority

1996

## ACA Enacted

Includes a major expansion of health centers, dedicating \$9.5 billion to serve 20 million new patients by 2015 and \$1.5 billion for capital needs for new health centers.

2010

1975

**Public Health Service Act**  
Health Center Program authorized under Section 330 of the Public Health Service Act.

1987

## Field Sanitation Standard

Requires agricultural employers to provide potable water, toilets and handwashing facilities in the fields

1992

## Worker Protection Standard

sets minimum standards for protecting farmworkers from pesticide exposure

2017

## WPS Revisions

# Farmworker Exceptionalism

- Fair Labor Standards Act left out farmworkers
  - Child labor protections
  - Overtime
- Workers' compensation & minimum wage
- Few OSHA standards to protect farmworkers
  - Field Sanitation Standard, 1987
  - Only applies to farms with 11 workers or housing

# Physical Health

---

The health issues that face migrant and other mobile underserved populations are similar to those faced by the general population but are often magnified or compounded by their migratory lifestyle, living conditions, and occupation.

# Management of Health Concerns

---

- Diabetes
- Hypertension
- Cancer
- HIV/AIDS
- Tuberculosis
- Asthma

## Issues experienced by essential workers before, during and after a disaster or public health emergency

---

COVID-19 served to highlight that Farmwork is considered “essential”

Challenges adhering to COVID-19 guidelines:

- Overcrowding with many people in small spaces
- Ability to isolate if exposed to or infected by COVID-19
- Limited or no PPE provided
- Limited access to testing, treatment, and vaccinations

Access to public benefits, including emergency benefits (housing, food, medical care)

- Lack of Information or misinformation about what is available
- Eligibility
- Language

Additional challenges related to working and living conditions:

- Transportation to and from the fields and into town
- Fear of accessing health care/taking sick leave due to employer retaliation

---

## Contributing Factors to Mental Health Challenges

---

- Separation from families
- Isolation
- Discrimination
- Fear due to immigration status
- COVID-19

---

## Illnesses Related to Substandard Housing

---

- Gastrointestinal diseases
- Infectious diseases
- Intestinal parasites
- Conjunctivitis
- Lead poisoning

# Work-Related Health Risks

- Pesticide Exposure
- Musculoskeletal injuries
- Heat stress
- Wildfire smoke
- Farm equipment
- Transportation to and from work
- Lacerations from sharp equipment and hand tools
- Slips, trips, and falls
- Eye injuries
- Insect/rodent/snake bites

# Occupational Safety and Health Protections

---

- Field Sanitation Standard (OSHA) – 1987
  - Requires potable drinking water, toilets and handwashing facilities, and information on good hygiene practices
  - See [Clinician's Guide to Field Sanitation Standard](#)
- Worker Protection Standard (EPA) – promulgated in 1992, updated in 2015
  - Requires employers to comply with minimum safety precautions when using pesticides on farms, and in nurseries, greenhouses, and forests
  - See [Clinician's Guide to Worker Protection Standard](#)
- [California](#), [Oregon](#), and [Washington](#)\* have a Wildfire Standard in place (\*Washington is in the process of finalizing a permanent rule)
- [California](#), [Oregon](#), [Colorado](#), [Washington](#)\* have a Heat Standard in place (\*Washington is in the process of updating its regulations)

# Labor and Health Protections

---

## Migrant and Seasonal Agricultural Worker Protection Act – 1983

- Provides basic labor protections for workers who work under labor contractors

## Workers' Compensation

- Agricultural worker coverage varies by state. Only 14 states (and DC, the Virgin Islands, and Puerto Rico) require full workers' compensation coverage for agricultural workers. In all other states, coverage is either limited or optional.
- See Guide to Workers' Compensation for Clinicians Serving Agricultural Workers

## Affordable Care Act – 2010

- 26% of workers were offered employer-provided health insurance \*
- 48% of workers have health insurance \*
- 44% of workers reported that a member of their household received Medicaid \*

# Workshop Components

- Overview of agricultural worker health and safety concerns
- **Service delivery innovations**
- Resources for health centers to address issues for agricultural workers.

# Service Delivery Challenges

## Continuity of Care

- Agricultural workers may move during treatment
- Agricultural workers may seek care only when necessary
- Communication between MHCs and other providers is difficult

## Culture and Language

- Provision of multi-lingual services (reception, health education, prescriptions, bilingual staff/translators, etc.)
- Relevant training and continuing education for staff

# Service Delivery Challenges

## Operations

- Integration of walk-in patients into appointment system
- Health Center hours of operation
- Demand/Capacity
- Provision of transportation in rural areas

## Costs

- MHCs must remain competitive despite the escalating costs in the healthcare industry
- Lack of insurance coverage of the population
- Outreach and enabling services are often not reimbursable

# Exploring Effective Adaptations for Mobility and Culture

---

## **Cultural adaptations**

- Culturally sensitive education
- Appropriate language and literacy levels
- Address cultural health beliefs & values

## **Mobility adaptations**

- Portable medical records & Bridge Case Management
- EHR transmission to other C/MHCs

## **Appropriate service delivery models**

- Case Management
- Lay health promoters (Promotores/as)
- Outreach & enabling services
- Coordination with schools and worksites
- Mobile Units

# Zoom Poll

Does your organization offer any of these adaptations or services to better serve farmworkers in your community?

- Yes
- No
- I don't know

# Easy Access to Care

- ✓ **Orient** all patients to the scheduling protocols, recognizing that patients may be unfamiliar with scheduling practices or U.S. healthcare systems.
- ✓ **Document** the numbers of agricultural workers in your area by month, typical work hours and transportation options.
- ✓ Open Access scheduling permits an influx of mobile agricultural worker patients to be seen during **seasonal variance**.
- ✓ **Accommodate** the work hours, transportation and geographic barriers experienced by mobile workers.

# Partnerships

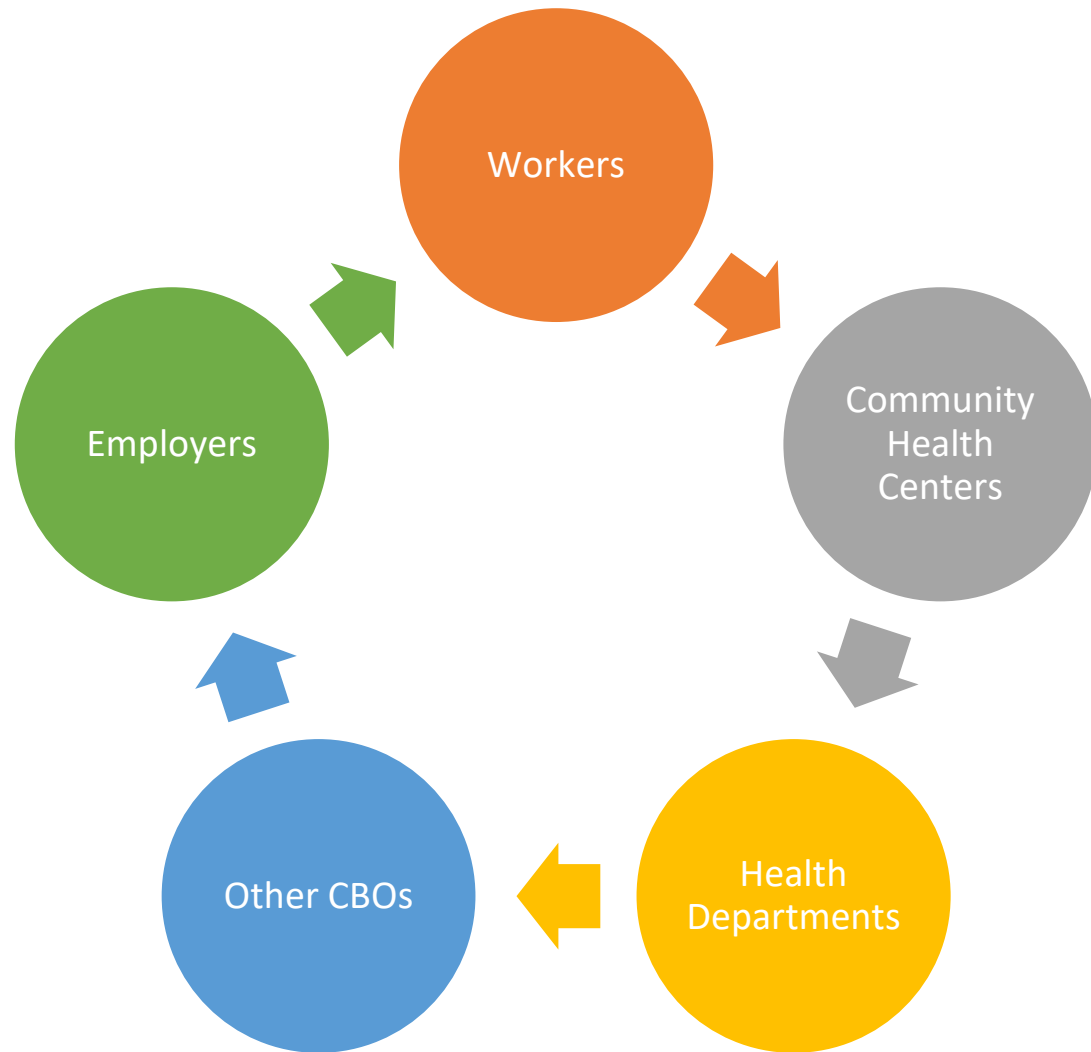

Photo by Tony Loreti for MHP Salud

## Voucher Program Model

- Used where a traditional model may not be the best option.
  - ✓ Short growing seasons
  - ✓ Lower numbers or density of Agricultural Workers
- Provide services to Ag Workers through either one or some combination of a service coordinator model, nurse staffed model, or mid-level practitioner staffed model
- An organized outreach program is critical to increase access to services

# Workshop Components

- Overview of agricultural worker health and safety concerns
- Service delivery innovations
- **Resources for health centers to address issues for agricultural workers.**

# Farmworker Health Network

**MHP Salud** is a national nonprofit organization that implements and supports Community Health Worker (CHW) programs. MHP Salud builds on community strengths to improve health in farmworker and border communities. We train community leaders to be CHWs/*Promotores de Salud*.

CHWs / *Promotores de Salud* belong to the same culture and speak the same language as those they serve. They...

- Provide culturally appropriate health education

- Make referrals to health and social services

- Encourage people to seek care

- Empower community members

- Bring health to farmworkers where they live

We can help you...

- Design an effective *Promotora* program

- Find funding opportunities and draft budgets

- Create an evaluation plan

- Train Program Supervisors and *Promotores*

- Provide and develop health education materials

# Community Health Worker Resource Directory

## Featured Resource

### Peers and Community Health Workers (CHWs): The Key Ingredient for Diabetes Prevention and Control Programs

More than 27 million people in the United States, or 11.2%

We've used over 35 years of our expertise in the CHW profession to create and find high quality resources for CHWs and individuals working in CHW programs.

Community Health Workers, community members and health professionals review all materials prior to use and distribution. Each item is tested for literacy level and relevance to the populations MHP Salud serves. Although many of our resources were developed with Latino communities in mind, the majority of our them can be used to support any underserved community. MHP Salud also identifies appropriate materials and resources from other organizations and maintains a list of these resources and

### Providing Diabetes Control Education and Management

This resource provides educational prevention tools that Community Health Workers (CHWs) can use and share with Migrant Seasonal Agricultural Workers and other vulnerable populations to reduce diabetic health complications.

### Chronic Disease Management Tool

This tool is meant to assist individuals and/or their caregivers in keeping track of the management of their chronic condition(s). It is meant to provide a weekly snapshot or overview of their health and any concerns they may have. It is NOT meant to be a complete tool for tracking chronic disease management, nor should it replace any record-keeping a doctor or healthcare provider has given.

# Subscribe!

**MHP Salud** has **officially** launched it's **Youtube account!** Subscribe to our channel to watch videos of all the hard work you do out in the community, informative interviews, and much more!

MIGRANT CLINICIANS NETWORK

**A force for health justice**

**Somos una fuerza dedicada a  
la justicia en salud**

**Our mission** is to create practical solutions at the intersection of vulnerability, migration, and health.

**We envision** a world based on health justice and equity, where migration is never an impediment to well-being.

# Our Work

Resource Development

This block features three overlapping book covers. The leftmost cover is titled 'AUNQUE CE SANO' and shows a group of people in a rural setting. The middle cover is titled 'JUN APRE-OSOS' and shows a group of people. The rightmost cover is titled 'DORO MEN' and features a cartoon illustration of a man's face.

Education

This block shows a woman in a white sleeveless top and patterned skirt standing and presenting to two seated women. A large screen behind her displays a photograph of a group of people.

Research

This block depicts four people gathered around a laptop. A man in a dark blue polo shirt stands on the left, while a woman in a patterned top, a man in a dark shirt, and a woman in a pink top are seated or standing behind the laptop.

Bridge Case Management

This block shows a man in a dark blue shirt using a stethoscope on a young child. Another man in a dark jacket stands behind the child, smiling.

Worker Health and Safety

This block shows two men in work attire. One man is wearing a blue shirt and an orange safety vest, while the other is wearing a grey hoodie and a red safety mask. They are holding a cardboard box labeled 'LIMITED EDITION'.

Psychosocial Support for Providers

This block shows a laptop screen displaying a video conference with four participants in separate windows.

Advocacy

This block shows a group of seven people standing together. A woman in the center is holding a white sign that reads 'MEN is a force for healthy communities!'. Several people are wearing blue t-shirts with the 'MEN' logo.

Peer Networking

This block shows two men wearing full-body white protective suits, including face shields and masks, standing against a blue background.

Migrant Health Centers 2020

**Your Health Keeping Your Diabetes Under Control**

- 1 Eat healthy**
  - Eat the right food with the right size portions. Too much or too little can affect your glucose levels.
  - Read food labels. Choose foods low in calories, fat, sugar and salt.
  - Do not skip meals.
  - Limit alcohol. Too much can lower your glucose level.
- 2 Exercise**
  - Do aerobic activities like walking, jogging, and bicycling. It helps your body use insulin better.
  - Do strengthening activities like weights or resistance bands. It helps lower blood glucose.
  - Talk to your doctor if exercise makes your glucose level go down.
- 3 Check your glucose levels and keep track of your results**
  - Check your glucose level at a particular time all the time or give a sample of your blood sugar in the low, high or just right.
  - Get your A1C checked at your doctor's office at least once a year. This test can show your average blood sugar level over the past three months. By checking your A1C, you know if your diet, your exercise plan and medicine are working or need to be changed.
- 4 Take your medicine**
  - Take your medicine on time and never if you feel well.
  - Refill your medicine on time.
  - Take the right amount of medicine. Too much or too little medicine can make your glucose level go up or down.

**Variantes del COVID-19**

**¿Qué son las variantes?**

- Los virus cambian de forma natural con el tiempo, y crean nuevas variantes.
- Algunas variantes se desdibujan y desaparecen, mientras que otras se mantienen y se propagan (como Delta y Ómicron).

**¿Qué necesito saber acerca de las variantes?**

- Si usted ya tuvo COVID-19, es posible que lo dé otra vez.
- A veces, las nuevas variantes pueden tener síntomas diferentes, que pueden ser leves o severos.
- Algunas variantes se pueden propagar de forma más fácil o volverse resistentes a los tratamientos o vacunas que existen.

**Las mejores maneras de mantenerme a mí y a mi comunidad protegidos de nuevas variantes son:**

- Estar informado y conocer el nivel de COVID-19 en la comunidad donde vivo
- Vacunarme
- Recibir el refuerzo de la vacuna cuando sea mi turno
- Hágase la prueba antes de reunirse con otros si tiene síntomas o ha estado expuesto
- Usar mi rubereboca \*
- Permanecer a pies (2 metros) lejos de otros cuando sea posible
- Evite las multitudes
- Realice sus reuniones en áreas ventiladas
- Lavarme las manos con frecuencia

\*Si vive en una zona con niveles consistentes elevados de COVID-19 o con un riesgo de infección de forma grave a causa de COVID-19. Para más información, póngase en contacto con su proveedor de atención médica.
